

Frontend Developer

Core Competency

- Experienced JS developer (Angular, jQuery, Backbone.js, Marionette.js, VueJS, ReactJS)
- High quality of HTML / CSS coding
- Responsive and adaptive web-sites for mobile devices
- Strong designer's skills and vision. Fluent with Photoshop and Illustrator
- Fast learner: I need to read documentation to start using something new
- High level of responsibility: I can't stop until a critical bug will be closed
- Logical thinking: DRY, clean html and js, structured css
- Like teamwork: I'm always open for questions, discussions, help and fun

Achievements

- A1 Payments – Ionic 4 (Angular 7) application for Android/iOS.
- CreditGate24 – Crowdlending platform, built with ReactJS.
- goodwheel.de – Vehicle parts seller. Backoffice application development using Angular 5. RoR application on API. Also I worked as junior RoR developer.
- Traffic Monitoring System – singlepage application for monitoring vehicles/drivers activity for public transportation companies. Made with Angular 4.
- 360 photo editor and player for WIX.com. Built with ReactJS.
- Pinlink.co – Bookmarks management tool made as singlepage application using Angular 5. Chrome and Safari browser extensions.
- MEHRKANAL Marketing Management System. Development of the singlepage application with Angular 4.
- Lead frontend developer in the Viar.live web-application project. Creation and management of 360deg spherical photos and compiling them into virtual tours. Rest API Backbone.js application written with CoffeeScript, Jade, SCSS.
- Large web-application for genomic and biomedical scientists. Frontend of this project was made with Backbone.js. I made all design, icons, layouts, hamlc coding, css/scss and big part of JS (CoffeeScript).
- New generation of personal finance management system (fentury.com). Complex web-application made with Backbone/Marionette. I did all Haml/Hamlc code, SCSS, Mobile version of the project and part of CoffeeScripts.
